

# **Intel Investment Announcement**

Remarks by Gov. Jan Brewer

Tuesday, October 19, 2010

*2<sup>nd</sup> Floor Conference Room*

Good morning everyone!

The ability of our state to compete in the global economy requires a commitment to innovation, creativity and excellence.

We created the new Commerce Authority knowing that the competitive nature of the global market requires our absolute resolve, focus and collaboration with private sector partners.

Arizona is competitive when our policies create an environment which supports innovation, rewards investment, minimizes government intervention, and encourages productivity.

Arizona IS competing, and we are witnessing the benefits.

One such example is Intel Corporation.

For 30 years Intel has contributed significantly to Arizona's economic prosperity.

Its break-through technologies have changed our lives.

The high-paying jobs generate stability and significant economic activity.

Their multi-billion-dollar investments are crucial to the overall economic fabric of our state.

However, what really sets Intel apart from others is what they do to improve education, environmental performance and our communities over all.

Intel demonstrates consistent leadership and commitment as they work with us to address some of our state's most pressing challenges.

From helping train more than 10,000 Arizona teachers in the effective use of technology in the classroom to the thousands of students learning math and science and competing in Intel-sponsored science and engineering fairs.

From engaging with stakeholders in an open and transparent manner as they improve environmental stewardship to promoting best practices in water conservation. Intel is a world-class innovator and exemplifies the very best in corporate citizenship.

I am delighted to now introduce John Pemberton, Intel vice president and plant manager for "Fab 32," who has some very exciting news to share for Arizona.

John ...
